PALME SHOWER OASES

EXPERIENCE OUR PASSION FOR THE EXCEPTIONAL

When you choose PALME, you get premium Austrian quality and a team that is truly passionate about its products. You can expect

- the highest standards
- more than 45 years of experience
- shower oases designed to enthrall
- unparalleled ease of cleaning and use
- a 25 year warranty (on selected shower oases)
- a spare parts after-sales guarantee of up to 30 years
- straightforward installation
- functional, cost effective and innovative solutions

We always think one step ahead and work on refining our ideas of just how sublime and convenient showering should be – both for people living alone and for multiple generations under one roof.

PALME. FIRST GLASS SHOWER COMFORT.

Take our word for it.

A NEW TYPE OF LUXURY

APREJO design fittings from PALME set new standards in convenience, elegance and perfectly harmonised design.

Their slimline, timeless look make them a stunning addition to any bathroom. Robust and unbreakable thanks to high grade metal castings, they open the door for you to a special shower experience every single day. The sophisticated technology allows the widest possible opening radii, ensuring maximum comfort.

Their unobtrusive, elegant look hides another unique comfort system: PALM.lift automatically raises the doors a few millimetres when they are opened. They then glide smoothly over the tiles, even if installed flush with the floor. On closing, the doors are automatically lowered again and, in addition, pull themselves closed in the last 10 to 20 centimetres. When the doors are closed, the PALM.lift system in the APREJO design fittings provides increased splash protection thanks to the high contact pressure.

For years of pleasure: PALME design fittings leave nothing to be desired.

APREJO folding fitting | Slimline, flush design, also for folding doors

Robust and unbreakable
thanks to diecast metal

PIANA SLIDE PRO

2-part sliding door with side panel, profiles in Cenit chrome®, shown here with transparent tempered safety glass and a small splash rail

PIANA SLIDE

FOR AN UNFORGETTABLE SHOWER EXPERIENCE

The name says it all: gliding gently into boundless relaxation. Our elegant premium model offers you a unique shower experience, every single day.

PIANA SLIDE VARIO
4-part corner entry, with profiles
in Cenit chrome®

PIANA SLIDE TOP FEATURES

- Sliding doors
- 8 mm tempered safety glass
12 mm laminated safety glass (guide rail)
- One fixed and one sliding panel (in the 2-part version)
- Door sections run on rollers
- VARIO | PRO wall connection options
- Barrier-free or with small splash rail
- Available in 12 design glass panels (p. 40)

- 1 Optimum ease of use: high quality rollers on the glass frame ensure the doors slide wonderfully smoothly.
- 2 Precision down to the smallest detail: the magnet in the sealing profile keeps the doors gently closed and prevents even the slightest splash.
- 3 Perfect cleaning convenience with PALM.motion: a light push is all it takes to swivel the door very gently for ease of cleaning.
- 4 Stylish appearance: the optional splash rail ensures that as much water as possible remains in the shower, and at the same time, acts as an unobtrusive design element. Also available without a splash rail for barrier-free floor-level entry.

Standard height: **2120 mm** | Rollers: +55 mm | Clearance: 2000 mm

DRIVE 1.0
4-part corner entry with patented
PALM.magnet, shown here in a
barrier-free version

DRIVE 1.0

THE SUPERSTAR WITH SURPRISING EFFECTS

This shower has drive! Especially smart: the whisper rail provides for an almost silent sliding door action. And the shower doesn't fall short on looks, either: the rollers in the cross brace are integrated out of sight within the profile. With its classic design, it makes a stunning addition to any interior scheme and bathroom, including XXL alcoves. Special features such as PALM.magnet improve ease of use and provide a unique level of comfort and convenience. More about DRIVE on the following pages!

PALM.MAGNET

IRRESISTIBLY ATTRACTIVE COMFORT

Exclusive patent – only with PALME:
magnetic PALM.magnet rail for faster cleaning

A bathroom need not solely be a place where you attend to your daily ablutions. But it takes more than a beautiful interior design to convert a bathroom into a wellness oasis. True luxury can often be found in the hidden details and is only revealed through touch, insight and use.

DISCOVER PALM.MAGNET!

The patented magnetic rail enables completely simple, time saving cleaning:

a gentle press is all it takes to swivel the sliding doors inwards, so they can be cleaned easily in next to no time.

We put it to the test...

...and found cleaning takes only a fraction of the time with PALM.magnet!

and glass panels in tinted grey

DRIVE 1.0

TOP FEATURES

- Sliding doors
- Unique whisper rail for practically silent opening and closing (even with powder coated enclosures)
- Design hit: rollers in cross brace integrated out of sight within the profile!
- Sliding action that keeps the rollers off the floor: rollers do not get dirty or stuck, even after many years of use, thanks to the magnetic guide profile with all-round seal
- Patented PALM.magnet magnetic technology
- Integrated wall profile
- 31 – 49 mm floor profile
- Selected models also available in barrier-free versions
- Available in 6 design glass panels (p. 40)

1 Cleaning is made easy by the cross brace with all-round seal, shown here in a curved shower

2 Convenient, barrier-free entry without splash rail (in selected models)

3 Fixed from above through the cover of the upright profile. With 15mm infinitely variable tolerance.

RE-COVER YOUR WALLS — YOUR WAY

A touch of glamour in your living space

Adds negligibly to the wall thickness: our RE-COVER wall cladding opens up entirely fresh and straightforward options for the interior design of wet rooms! In combination with discreet aluminium end profiles, a completely new atmosphere can be created in next to no time.

THE BENEFITS AT A GLANCE:

- 6 mm aluminium composite wall cladding
- Standard format: 1000 x 2600 mm and 1500 x 2600 mm (special formats possible)
- Incredibly easy to work with
- Abrasion-resistant, scratch-resistant, chemical-resistant, colour-stable and food-safe
- Ideal for renovations: can be applied directly to existing tiles after cleaning
- Accurate fit at the joints
- Top cleaning convenience
- Also optionally available with antibacterial PALM.care surface

RE-COVER wall cladding comes in the following on-trend colours and patterns:

Matt pure white

Anthracite

Burgundy white

Light grey

Concrete grey

Dark grey

Rustic oak

Copper terracotta

PALME COMFORT

HABITUAL LUXURY

PALME.fix

The innovative magnetic closure in the silicone seal keeps the doors gently closed and prevents splashes.

PALME.magic

Magical LED lighting effects create a fascinating ambience – in the cross brace and/or wall profile.

PALME.lift

The lifting/lowering mechanism allows the doors to glide smoothly over the tiles or edge of the bath and seal perfectly when closed.

PALME.magnet

Patented: no mechanical release – a light push is all it takes to swivel the sliding doors inwards for easy cleaning.

PALME.free

Most PALME models offer barrier-free access. A small splash rail is available as an optional extra for many versions.

PALME.motion

Convenient swivel mechanism activated by pressing gently with a finger for ease of cleaning, even in hard-to-reach places.

PALME.soft

As if on rails: sliding doors with PALME.soft gently open and close on their own and prevent splashes.

PALME.pro

Patented and unique: the PALME.pro system profile enables quick and uncomplicated wall mounting of fixed glass sections. Details on page 17.

CLEAN IN WITHOUT LEAVING

PALME shower oases take the stress of life away while also cutting down significantly on your cleaning time. They are all designed in keeping with the integrated PALM.isi-clean principle. Without unnecessary joints and edges, for example, optimum cleaning convenience is assured. For ultimate cleanliness, we offer the PALM.nano glass coating and the antibacterial PALM.care profile surfaces. So that you can simply focus on the pleasures of life.

PALM.isi-clean

A clean affair down to the smallest detail: the PALM.isi-clean principle extends to easy-care surfaces and flush fittings which minimise unnecessary joints, edges and other places where dirt can get trapped.

PALM.care

Effective long-term protection against germs and bacteria: as a permanent material component, PALM.care uses silver ions to prevent the growth of bacteria and fungi on the profile surface. Hindering active germ growth between cleaning cycles makes this feature an ideal supplement to regular disinfection!

A FLASH

A TRACE

PALM.nano

The water forms droplets: with the optional special coating, the water beads up and rolls off the surface, leaving virtually no trace. Limescale and deposits are given no chance to attack the glass surface.

With PALM.nano:

The water simply rolls off the glass surface – giving limescale and deposits no chance to penetrate.

Without PALM.nano:

The water settles like a film on the glass surface, leaving deposits behind.

Tested and confirmed by TÜVRheinland®:
if cleaned correctly, the PALM.nano coating lasts
for at least 10 years!

DESIGNS USING GLASS

Make a statement: our glass enclosures can turn your shower oasis into your personal inner sanctum, provide discreet screening or transform your shower into a unique work of art – you decide what suits you best!

When it comes to genuine glass enclosures, we use only tempered safety glass – transparent or with various tints and texture effects. The benefits are crystal clear: high resistance to temperature change, impact, bending and shock, terrific ease of cleaning and much more.

PALM.nano protects the glass even further: the optional special coating makes the water simply form droplets and roll off – limescale and other deposits cannot penetrate the glass surface.

In some series, patterned acrylic glass is available as an option.

Safe from spontaneous breakage: on request, the tempered safety glass in your PALME product can be pretreated at 290 °C in a special heat soak oven to all but rule out spontaneous breakage. Please contact our advisors – we'd be pleased to tell you more!

GLASS SHELF

PALME thinks beyond showers: our storage units are a charming yet practical addition that work as both a glass shelf and towel holder. Can be combined with any fixed/side panel made of tempered safety glass measuring 900 mm or more in width. Installed outside or inside, the units give your shower accessories a home of their own.

TOUCHINGLY USEFUL

HANDLES

The first contact with your shower: we offer a wide selection of design handles in silver, chrome, metallic gold and attractive design colours.

THE POWER OF COLOUR

IN YOUR BATHROOM

A world without colour is unthinkable – colour expresses so much. Not only does it influence the atmosphere of a room, but also our mood. You may prefer small accents of colour here and there, or like to splash your favourite colour lavishly throughout the room. Give your creativity free rein – our special anodising surface treatment and in-house powder coating plant bring a fantastic world of colour to life.

Anodised surfaces

PALME shower oases are equipped with anodised surfaces as standard, which are particularly easy to clean thanks to a new profile finishing technique. PALME can cut sections to size and drill holes before the anodising treatment – which ensures our unique PALME quality!

Powder coated surfaces

Thanks to our special powder coating process, there are no limits to the colours you can choose. In addition to our standard profile colours, many models are available in all RAL colours for an extra charge.

PALM.care

for long term protection against germs and bacteria

For exceptionally high levels of hygiene, we also offer our profiles in antibacterial colours, applying century-old wisdom about the antimicrobial effect of silver. Through a special combination of active ingredients, including silver ions, PALM.care prevents the growth of bacteria and fungi on the profile surface.

PALM.care – for exceptional cleanliness and hygiene:

- Remains effective in the shower oasis profile throughout the entire service life
- Available in the surface colours aluminium silver and now white gloss
- Combine PALM.care with the PALM.nano special coating for all-round maximum cleaning convenience.

QUALITY FROM

MANUFACTURING AT PALME

At PALME, our employees have vision.

Focus and precision for truly perfect results

Passion, professionalism & perfection – for your showering comfort and convenience

With a passion for first-class quality and incredible attention to detail, we produce the ingredients for a shower experience that is second to none at our 20,000 m² PALME manufacturing facility. We refine our experience of more than 45 years with fresh design ideas, state of the art technology and innovative concepts.

With our own coating plant for anodising surface treatments, we guarantee long lasting PALME quality.

Innovation, production depth and top quality: PALME meets every customer requirement.

PALME brings exclusive colour worlds to your bathroom.

Unique: in-house coating plant

At PALME, we have our own coating plant where we carry out anodising surface treatments. This is the only way for us to ensure a premium surface finish, thereby providing decades of corrosion protection and allowing us to guarantee lasting quality in both material and colour. If, for example, spare parts are needed after many years, the profiles and new parts will still have the same colour.

M AUSTRIA:

We listen: customer requests are a source of inspiration

In direct dialogue with our customers and taking into consideration their everyday requests and requirements, we have already designed around three dozen patents and utility models. At the end of the day, our focus is always on your needs and satisfaction.

Custom manufacturing

On request, your PALME shower oasis is manufactured precisely to your specifications: in addition to standard versions, we also produce special, customised solutions of millimetre accuracy in batch sizes of one or more.

PALME shower oases – made in Austria

- 20,000 m² manufacturing facility
- In-house coating plants for anodising surface treatments and powder coating
- Our own TÜV-certified procedure for PALM.nano special coating
- Tried and tested quality that far exceeds DIN standards
- Quality endurance tests (glass temperature shock tests, continuous stress tests – opening and closing by robot approx. 70,000 times)
- Everything from batch sizes of 1 (= individual made-to-measure production) through to series manufacturing
- Nationwide service teams
- And much more!
